Career Objective:

I'm a Web Developer with professional internship experience at Blackly. I design, build & maintain production ready web applications using modern JavaScript technologies, working across frontend and backend systems. I focus on solving practical problems and contributing to reliable products.

Skills:

Languages : JavaScript, TypeScript
Frontend : React, Next.js, Redux, React Router, Tanstack, Tailwind CSS, Shadcn
Backend : Node.js, Express.js, Rest APIs, Firebase, JWT, Passport.js, Stripe, Zod
Databases : PostgreSQL, MongoDB, Prisma, Mongoose

Experience:

Company : Blackly
Designation : Frontend Developer Intern
Duration : April 2025 - July 2025
Responsibilities : Developed accessible React-based UI components from Figma, integrated REST APIs, managed application state with Redux/Context API, optimized performance in production environments.

Projects:

Lorvic - Multi Vendor E-Commerz:

[Live](#) [Client-site](#) [Server-site](#)

A multi vendor e-commerce platform, built to manage shared operations, control access and prevent workflow conflicts with clear ownership, role-based authorization and reliable data handling across the system architecture.

- Structured role-based domain modules with strict access boundaries and secured resource ownership
- Implemented vendor-scoped catalog and inventory controls ensuring accurate stock consistency
- Enabled secure Stripe checkout with webhook verification for reliable payment confirmation

Tech Stack: Typescript, Next.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Passport.js, Stripe, Cloudinary, Shadcn

Velocia - Ride Sharing Platform:

[Live](#) [Client-site](#) [Server-site](#)

A modern ride-sharing system that supports live ride requests, driver matching, and real-time status updates while keeping ride state predictable, user actions synchronized and trip workflows consistent across active user sessions.

- Developed real-time ride workflows for driver matching, request handling and status transitions systemwide
- Engineered driver availability controls and ride lifecycle logic with strict role-based access permissions
- Integrated live ride tracking and real-time notifications for continuous rider-driver synchronization

Tech Stack: Typescript, React.js, Redux, Node.js, Express.js, Mongoose, Redis, JWT, Passport.js, Nodemailer, Shadcn

Education:

Institute : Jamia Islamia Dhaka
Degree : Master's Degree in Islamic Studies
Duration : 2022 - 2024

Languages:

English : Proficient (Written and Spoken)
Arabic : Native (Written & Spoken)
Bangla : Proficient (Reading & Writing), Conversational (Speaking)
